Education

Mohan Babu University **Aug. 2024 – May 2028**

Bachelor of Technology in Computer Science with a specilaization in Data Science

Relevant Coursework

- Data Structures
- Statistics
- Operating Systems
- Database Management
- Advanced Excel
- Data Science
- Probability
- Cloud Computing

Experience

Infosys Springboard Internship 7.0

Data Visualization Intern

- Worked in an Agile methodology to develop an AI-Powered Workforce Management Automation System for 200 synthetic employees.
- Developed data-driven modules for employee management, attendance, leave, payroll, performance monitoring, and workforce planning.
- Implemented REST APIs using FastAPI to provide structured access to workforce management data and automation modules.

AatonovaZ Technologies Private Limited

Technical Intern

- Worked on technical projects involving automation, AI tools, and emerging technologies to develop practical solutions.
- Explored and implemented IoT-based solutions using platforms such as Arduino and Raspberry Pi.
- Utilized AI-powered development tools and vibe coding approaches to accelerate prototyping, development, and problem-solving.
- Gained hands-on experience in integrating software, AI tools, and hardware components to build technology-driven solutions.

Projects

Customer Behavior Analysis Dashboard | *Power BI, Excel, SQL*

- Developed an interactive Power BI dashboard to analyze customer purchasing behavior and business performance.
- Designed dynamic visualizations to track sales, revenue, customer demographics, subscription status, and product categories.
- Created interactive filters using DAX to enable data-driven decision making.

Netflix Movie Analysis | *Python, Pandas, Matplotlib, Seaborn*

- Performed exploratory data analysis on the Netflix Movies and TV Shows dataset using Python.
- Analyzed trends based on genres, release years, ratings, countries, and content distribution.
- Generated visualizations and insights to identify viewing patterns and content trends.

AI-Powered Workforce Management Automation System | *Python, MongoDB, FastAPI*

- Developed a workforce management system to automate employee, attendance, leave, payroll, performance, and workforce planning processes.
- Generated and managed synthetic employee data in MongoDB to support workforce analytics, data validation, and system testing.
- Implemented REST APIs using FastAPI for structured access to employee and workforce management data.

Technical Skills

Programming Languages: Python, Java, SQL
Data Analytics: Data Analysis, Statistical Analysis, Data Cleaning, Exploratory Data Analysis
Data Visualization: Microsoft Excel, Power BI, Tableau, Matplotlib
Cloud Computing: Cloud Computing Basics, AWS
Platforms: GitHub, n8n
AI Tools: ChatGPT, Claude, Antigravity, AI-Assisted Development, Vibe Coding
Professional Skills: Leadership, Teamwork, Business Communication, Problem Solving, Time Management

Leadership / Extracurricular

Google Developer Group On Campus Hackathon — 7th Place **Departmental Club Hackathon** — 1st Place

SVCET Techno Fest — Paper Presentation — 2nd Place
